

PRESSRELEASE

New order for Svenska Aerogel

- Quartzene key ingredient in thermo-insulating plaster

Svenska Aerogel AB - listed on Nasdaq First North - has received a first smaller order from the Italian manufacturer Barozzi Vernici. Quartzene is after a test phase included in its latest product for thermo-insulating plaster for exteriors. A big launch of this insulating Quartzene product starts this week by Barozzi at the great Italian tradeshow Klimahouse 2018.

In warmer countries, there is a great need to insulate against heat during the summer, but also to some extent the cold in the winter. Thermo-insulating plaster meets this demand and can also provide significant cost savings.

'We see a large commercial potential for thermo-insulating plaster with Quartzene. Barozzi has developed a solution, that will be launched in southern Europe and we will follow it with great interest, says Anders Lundström, CEO of Svenska Aerogel.
