Svenska Aerogel gets Taiwanese testorder

Nasdaq First North listed Svenska Aerogel has received a testorder on the company's heavily improved version of aerogel – Quartzene - from a Taiwanese customer. The order is received through the reseller Rayoung Chemtech Inc. The order is 500 kg Quartzene for a thermal insulation solution to be launched on the market.

'It is gratifying that more and more companies strive to develop products and solutions with Quartzene. For those who are testing our material, it is obvious that our version of aerogel leads the market - better functionality at half price, says Anders Lundström, CEO of Svenska Aerogel.
